

HWeb VIA The entire fleet... ...in real-time!

*Technology
Experts Working
to Grow Your
Business.*

The Hudson Group has created a useful and versatile vehicle tracking and location technology called **HWeb VIA (Vehicle Information and Auto-location)**. Using Global Positioning System (GPS) data, captured by a device installed in each vehicle, **HWeb VIA** assists dispatchers to more efficiently manage fleet resources and allows more effective and timely routing of vehicles and drivers. It is now possible to view the precise location of a single vehicle, or the entire fleet, in real-time! Dispatchers can monitor trip progress from with the HWeb Dispatcher application.

HWeb VIA Features

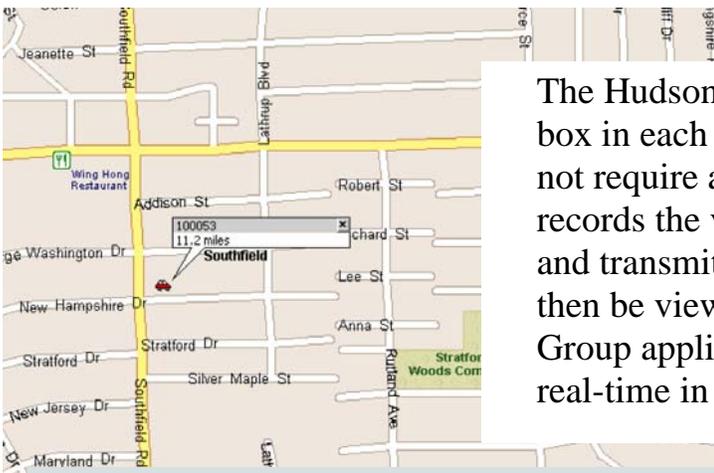

- Use a HotKey in HWeb Dispatcher to load a local/regional map displaying the current, real-time location of **ALL** vehicles in your fleet!
- From a Vehicle grid, you are able to place your mouse over a single, pair, or highlighted list of vehicles and with a mouse click you are able to map the vehicles, opening a full-screen map display of the region and see the current location of **all selected** vehicles!
- From a Trip grid in HWeb Dispatcher, you are able to place your mouse on any single trip and select an option to “Map the trip”. A full screen map display opens, showing all stops and/or pickup locations on the trip, along with the current, real-time location of the vehicle and driver!

Vehicle ID	Last Update	Last Location
19054	8/16/2006 2:07:00 PM	Logan Airport
17852	8/16/2006 11:18:00 PM	Stratham NH
17278	8/16/2006 1:26:00 AM	Boston MA
19038	8/16/2006 9:52:00 PM	New Castle NH
17134	8/15/2006 12:10:00 AM	Boston MA

Email: sales@HudsonLtd.com

The Hudson Group will will work with you to install a GPS box in each vehicle. This VTU (Vehicle Tracking Unit) does not require any external connections or antennas. The VTU records the vehicles movements, minute by minute, 24/7/365 and transmits the data via cellular networks. Vehicles may then be viewed and monitored on the Internet. The Hudson Group applications access this data and display vehicles in real-time in the local system utilizing Microsoft MapPoint.

HWeb VIA Benefits

- *Display the progress of the driver and vehicle at any time! Is a line run or important reservation, on-schedule? You will know!*
- *Determine the closest vehicle and estimate its arrival time when an ASAP client calls asking for immediate service.*
- *See fleet vehicles approaching an accident or traffic site and suggest alternate routing.*
- *Save money, time, fuel, mileage and wear and tear on vehicles with more efficient scheduling and routing.*
- *Get accurate and reliable vehicle locations, instantly, without calling the driver.*
- *Provide strategic directions and approximate distances to hard-to-find locations.*
- *Prevent delays; dispatchers can see vehicles heading to wrong locations..*
- *Know instantly, and certainly, the answer to the client question: “Where is my Car...?”*
- *Locate missing or inappropriately “borrowed” vehicles.*

An HWeb VIA account brings additional benefits:

- **Route Replay**: retrace vehicle positions and times for any day; providing absolute proof of service and the ability to settle disputes.
- **Management Reports**: measure fleet performance and pinpoint inefficiencies.
 - ✓ Minute by Minute report of a trip, including trip cost.
 - ✓ Idling report – indicates unnecessary idling.
 - ✓ Stop Time Report – measures Arr/Dep times, and wait time.
 - ✓ Hours Worked Report – verifies manually submitted time sheets.
 - ✓ Red Flag Report – highlights unusual vehicle activity, such as speeding.

Take advantage of HWeb VIA functionality in 3 easy steps:

1. Obtain latest version of HWeb Dispatcher application
2. Install Microsoft MapPoint
3. Outfit vehicles w/ Hudson GPS VTU

If you have additional questions about how to participate and take advantage of these system enhancements, please call The Hudson Group at 978.531.1115.
