WE'RE BACKING YOU UP!

The data you generate and manipulate on a daily basis is your business lifeblood. Not only is it critical to your operation but its security and reliability can be one of your greatest, unspoken concerns.

What would you do in the event of a *catastrophe* in your business? What if there was a fire, flood, storm, locusts, lightning strike or electrical failure in your area that destroyed your workstations, your file server or your data backups? Do you have a contingency plan? How much time could you afford to be "down?"

HWeb SafetyNet from The Hudson Group is your simple and cost-effective solution for managing such an event, should it ever occur. It can rescue you from disaster.

HWeb SafetyNet will backup your critical Hudson files automatically, on a daily basis (overnight) to secure off-site mirrored remote locations.

Registering for the HWeb SafetyNet will supplement your existing backup program. (You do have one, right?) Now you will have a redundant off-site system in addition to relying upon your staff to complete a backup onto CD-ROM, DVD-ROM, DAT or other media.

Hudson staff will monitor that all backups are completed on schedule and occurred without incident.

In the event of catastrophe, you will have the ability, using any computer, Terminal Ser-

"HWeb Safety Net... can Rescue you from disaster."

vices and an Internet Connection... to connect to the backup server and operate on a virtual platform until you are able to rebuild or restructure your office network.

This means that there would be virtually no interruption in your normal business workflow, in the event of an emergency. You will be able to do remote order entry and dispatching, including the remote printing of manifests and other operational information.

Once your replacement equipment is in place and connected to the internet,

Hudson Technical Support staff will be able to remotely configure and restore your office network in about 30 minutes!

Sounds Good ~ How much does it cost?
<20 Vehicles ~ \$50/month
<35 Vehicles ~ \$75/month
35+ Vehicles ~ \$125/month
Additional charges may apply in the event you wish to backup other non-Hudson files.

So for <\$2-\$4 per day, you will gain the peace of mind knowing that in the event of emergency or disaster, you will not miss a client or forget a reservation and can quickly restore your office network.

Where will you be and what will you be doing when your server fails? What happens when a fire, flood, or storm hits your facility? What happens when a disgruntled employee vandalizes your system?With HWeb SafetyNet, you have your solution, and peace of mind!

For more information, or to enroll today, call us at 617.499.1959 and press 3 for our Sales Department, or send an e-mail to: Sales@HudsonLtd.com.
